PROFESSIONAL SUMMARY

AI & ML undergraduate with strong technical proficiency in **Python, SQL, and product analytics**, sitting at the intersection of users, data, and dev teams to translate noisy user feedback and system telemetry into prioritized, dev-ready action items. Former **Technical Lead Intern at SMAP Technologies**, experienced in startup/beta-stage environments, error log analysis, and daily issue triage across engineering sprints. Skilled in **funnel and behavioral analysis**, **automated NLP feedback mining**, and interactive dashboarding, bringing structured rigor to resolve user friction and build reliable AI product experiences.

TECHNICAL SKILLS

Product Operations & Analytics: Product Telemetry & Funnel Analysis • Bug Triaging & Repro Steps • Linear • Notion • Mixpanel / Analytics Dashboards • Sentry / Log Analysis
Data & Statistical Analysis: SQL • Python • Pandas • NumPy • EDA & Trend Analysis • A/B Experimentation • Hypothesis Testing • Data Visualisation (Streamlit, Seaborn)
AI & Natural Language Processing: Generative AI • LLM Applications • RAG Architectures • NLP Sentiment & Pain Point Mining • Vector Search • OpenAI API
Data Engineering & Pipelines: ETL/ELT Pipelines • Snowflake • dbt • Apache Airflow • AWS S3 • Docker
Backend & Systems: FastAPI • PostgreSQL • Redis • REST APIs • Git • Linux Shell / Error Log Parsing

WORK EXPERIENCE

Technical Lead Intern — SMAP Technologies

Sep 2025 – Jan 2026

Project IRIS: AI-Based Face Recognition Attendance System | Bengaluru, India

- Architected and delivered **scalable backend services** using **FastAPI, PostgreSQL, Redis**, and REST APIs for a live AI application supporting **90+ camera feeds**, monitoring error logs and system health to prevent service drop-offs.
- Analyzed ingestion bottlenecks and telemetry to optimize attendance pipelines and dashboard analytics, **reducing end-to-end processing latency by 20%**.
- Triaged edge-case anomalies, isolated failure modes, and authored structured technical documentation and repro steps for asynchronous worker tasks.
- Led a team of **four developers** in an agile startup setting, coordinating sprint planning, daily bug triage, code reviews, and production releases.

PROJECTS

End-to-End GenAI & Feedback Intelligence Pipeline

2026

Python • SQL • OpenAI API • AWS S3 • Snowflake • dbt • Apache Airflow • Docker • Streamlit [\[GitHub ↗\]](#)

- Engineered an automated feedback intelligence system parsing **300K+ multi-channel customer reviews**, leveraging NLP to categorize sentiment, recurring bugs, and emerging user pain points.
- Built a **Retrieval-Augmented Generation (RAG)** pipeline enabling cross-functional teams to execute semantic Q&A over qualitative feedback, surfacing root causes behind negative signals in real time.
- Orchestrated automated data pipelines on AWS S3, Snowflake, and Airflow processing **10M+ records**; built an interactive **Streamlit dashboard** converting non-technical queries into SQL to democratize usage data.

Customer Behavioral Intelligence & Churn Analytics

2025 – 2026

Python • SQL • Pandas • Scikit-learn • XGBoost • K-Means • Statistical Analysis • Streamlit [\[GitHub ↗\]](#)

- Built an end-to-end **behavioral segmentation and intelligence system** across user cohorts, applying **RFM modeling and K-Means clustering** to isolate drop-off patterns and high-risk accounts.
- Conducted rigorous statistical validation (**ANOVA, Welch's t-test, Chi-Square**), isolating contract type as the primary churn driver ($\chi^2 = 133.99$, $p < 0.0001$) to inform targeted retention interventions.
- Formulated an **A/B testing retention framework with power analysis**, translating behavioral lift into projected revenue impact through an executive **Streamlit ROI decision dashboard**.

Demand Forecasting & S&OP Optimizer

2026

Python • Pandas • NumPy • Scikit-learn • XGBoost • Streamlit [\[Live App ↗\]](#) [\[GitHub ↗\]](#)

- Developed a predictive **operations forecasting system** on **76K transaction records**, leveraging **XGBoost** to track demand variance against pricing and promotional patterns ($R^2 = 0.889$, $MAPE = 12.85\%$ on out-of-time test data).
- Built an interactive **Streamlit scenario dashboard** simulating what-if pricing and promotional changes, enabling operations teams to proactively manage inventory replenishment.

EDUCATION

B.E. in Artificial Intelligence and Machine Learning

2023 – 2027

Dayananda Sagar Academy of Technology and Management (DSATM) | CGPA: 8.9 / 10.0

Pre-University — Science (PCM + CS)

2021 – 2023

REVA University, Bengaluru | 85%

CERTIFICATIONS

- Complete Data Science, Machine Learning, DL, NLP Bootcamp** — Udemy [\[Verify ↗\]](#)
- Python for Data Analysis: Pandas & NumPy** — Coursera [\[Verify ↗\]](#)
- Python for Data Visualization: Matplotlib & Seaborn (Enhanced)** — Coursera [\[Verify ↗\]](#)

LEADERSHIP & ACTIVITIES

Student Coordinator — ALMAtron (AI & ML Club), DSATM

2024 – Present

- Coordinated **Ai-VERSE 2026**, an inter-college tech fest with **200+ participants**; managed end-to-end event operations, technical workshops, and cross-team logistics.

Product Head & Valorant Head — Gaming Club, DSATM

2023 – 2025

- Led club **product strategy and event operations**; managed cross-functional teams, triaged real-time operational issues during live tournaments, and built communication channels across 100+ players.
