PROFESSIONAL SUMMARY

AI & ML undergraduate and Technical Lead Intern experienced in building production-grade real-time AI systems. Deployed a face recognition attendance platform (Project IRIS) processing 90+ live camera feeds. Built ResumePilot — a full-stack AI career intelligence platform with a 75-engine pipeline. Co-author of an IEEE-submitted paper on AI-based emergency mustering. Proficient across ML, backend APIs, and MLOps.

WORK EXPERIENCE

Technical Lead Intern — SMAP Technologies

Sep 2025 – Jan 2026

Project IRIS: AI-Based Face Recognition Attendance System | Bengaluru, India

- Architected scalable backend using FastAPI, PostgreSQL, and Redis; built async RTSP/ONVIF pipelines with ArcFace/FaceNet + FAISS for real-time face recognition across 90+ camera feeds
- Developed AI attendance modules for IN/OUT logging, dashboard analytics, and HR-integrated reporting; reduced system latency by 20% via caching and fault-tolerant alert mechanisms
- Led and mentored a cross-functional AI, backend, and DevOps team; coordinated sprint planning and system integration

RESEARCH & PUBLICATIONS

AI-Based Mustering Event System Using Real-Time Face Recognition

2025 – 2026

Submitted — CoMeSySo International Conference (IEEE) | DSATM | Under Dr. Deepa Mathew K.

- Co-authored IEEE-submitted paper on intelligent emergency personnel accountability using YOLOv8 (44.9% mAP, 60 FPS) + FaceNet512 (97.4% accuracy) + Deep SORT; designed three-layer edge-cloud architecture with sub-500ms latency

PROJECTS

ResumePilot — AI Career Intelligence Platform

2025 – 2026

Next.js 15 · FastAPI · PostgreSQL · Grok AI · spaCy · Docker · GitHub Actions · [GitHub](#)

- Built a full-stack AI resume tailoring platform with 75+ engine AI pipeline for JD extraction, semantic gap analysis, ATS optimisation, resume tailoring, and hallucination-safe content generation.
- Zero-hallucination guarantee prevents fabricated tech/projects in output; features Interview Simulator, Career Intelligence dashboards, and Personal Branding Engine; deployed via Docker Compose with CI/CD

AI-Based Mustering Event System — Research Prototype

2025 – 2026

YOLOv8 · FaceNet512 · MTCNN · Deep SORT · Python

- Designed edge-cloud architecture (IP cameras → GPU server → accountability dashboard); benchmarked YOLOv8 vs Faster R-CNN and Mask R-CNN; Softmax-based evacuation routing and multi-camera identity fusion with $\pm 30s$ temporal filtering

EDUCATION

B.E. in Artificial Intelligence and Machine Learning

2023 – 2027

Dayananda Sagar Academy of Technology and Management (DSATM) | CGPA: 8.9 / 10.0

Pre-University — Science (PCM + CS)

2021 – 2023

REVA University, Bengaluru | 84%

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript

ML / Data Science: Scikit-learn, TensorFlow, Pandas, NumPy, Seaborn, XGBoost

Computer Vision & DL: OpenCV, YOLOv8, FaceNet512, ArcFace, Deep SORT

Backend & APIs: FastAPI, Flask, PostgreSQL, Redis, WebSockets

Frontend: Next.js, React

MLOps & DevOps: Docker, GitHub Actions, Prometheus, Grafana

LEADERSHIP & ACTIVITIES

Student Coordinator — ALMAtron (AI & ML Club), DSATM

2024 – Present

- Coordinated Ai-VERSE 2026, an inter-college tech fest with 200+ participants; organised workshops and ML bootcamps

Product Head & Valorant Head — Gaming Club, DSATM

2023 – 2025

- Led club product strategy and event operations; headed Valorant division — organised inter-college tournaments and managed competitive team rosters
